SUMMARY

Data analyst with a quantitative background (B.Sc. in Science and Technology; Chemical Engineering, Dec 2026) and about 2 years of experience at Novo Nordisk and Alpargatas. I turn raw data from SAP, lab systems and SQL Server into **dashboards and narrative insights** that drive decisions, using **SQL**, **Python** and **descriptive and exploratory statistics**. Working in a regulated pharmaceutical environment taught me a strong focus on **data quality**. I automate reporting with Power Automate and **generative AI (Copilot)**. Results include a **35% reduction in sample delays** and **40 minutes saved per day** through automation.

EXPERIENCE

Novo Nordisk · Intern, Microbiological Quality Control and Supply Chain — Jul 2025 – present

- Built **Lead Time and Timeliness dashboards** used in daily planning and department meetings, helping **reduce sample delays by 35%**.
- Built the **weekly reporting dashboard** (insulin, water and raw materials), extracting and cleaning data from SAP, Global LIMS and PEMS with **SQL Server** and Power Query to track trends.
- Developed a **daily and next-day forecast** of plate volume to support team sizing.
- **Automated reporting workflows**: Teams alerts for critical tasks (Power Automate) and a Power Apps app with a **generative AI chatbot (Copilot)** that **saves technicians 40 min/day**.
- Gathered requirements with business users to define the KPIs and features of each dashboard.

Alpargatas · Intern, Engineering and Maintenance Planning — Feb 2025 – Jul 2025

- Led a **Lean Six Sigma Yellow Belt** project with a Power BI dashboard (SAP data) tracking work orders, failures and repair time; the dashboard is still in use.
- Coordinated the **5S rollout** in the workshops and supported work-order prioritization with KPIs.

PROJECTS

Sales, Profitability and Customers (AdventureWorks) · SQL Server, Power BI, DAX — Demo · Code

- Built a **star schema in SQL Server** and profiled, cleaned and validated every table with SQL (joins, CTEs, window functions); **reconciled every DAX measure** against its SQL query.
- Segmented **17.4k customers with RFM** and flagged an unexplained revenue jump and an **At-Risk segment holding 24% of revenue**.

Delivery Intelligence · Python, pandas, NumPy, Plotly, Streamlit, pytest — Dashboard · Code

- Cleaned and audited **41k raw orders in Python** and used **OLS regression** to isolate the effect of traffic, weather, distance and load on delivery time.
- Found that heavy traffic drives **53.5% of delays** and recommended routing changes (**−2.3 min** on average) in a published executive dashboard.

Research paper · Revista de Engenharia e Tecnologia · R

- R package that automates the statistical validation of analytical methods.

EDUCATION

B.Sc. in Science and Technology · UFVJM (completed) — 2019 – 2023
B.Eng. in Chemical Engineering · UFVJM — expected Dec 2026

SKILLS

SQL and Data: SQL Server, MySQL, joins, CTEs, window functions, star schema, ETL, SAP
Python and Statistics: pandas, NumPy, Plotly, Streamlit, pytest, descriptive statistics, EDA, regression, R
BI and Visualization: Power BI, DAX, Power Query, Power BI Service, KPIs, data storytelling
Automation and AI: Power Automate, Power Apps, Microsoft Copilot (generative AI), Office Scripts, Git and GitHub

CERTIFICATIONS

Python, SQL, Git and GitHub, Python Virtual Environments · Comunidade DS — 2026
Lean Six Sigma Yellow Belt · FM2S — 2025

LANGUAGES

Portuguese: native | **English:** intermediate (B1) | **Spanish:** basic
